

# Feedback

Write three adjectives that describe your experience with the workshop.

What particular motivation did you have for attending the workshop?

Were you clear about the aims of the overall workshop and the various tasks and activities? If not please say where you felt unclear.

Overall how difficult did you find the process? Where there any specific tasks you found difficult?

Did you learn or uncover anything about your procedures that surprised you or that you found particularly useful? If so, briefly elaborate.

In your view, how effective was the workshop in uncovering concepts that might help describe or organising our laboratory procedures and knowledge?

What parts of the workshop did you enjoy or find interesting? What tasks or parts of the workshop could be improved?
