Icon

Icon

Context
Specify the scientific or laboratory context for the pattern. Try to be precise.
What situations does this pattern cover?

Solution
Describe how to balance the forces that create the problem. Tell us what we have to do.

Support and rationale
Elaborate on the reasoning behind how the solution balances the forces.
Note theoretical or empirical support. Reference theories, examples, web resources, pulications etc...

Problem
Write a concise description of the probem. Define the problem as a conflict of 'forces' that dominate the situation (in this context).

Forces
Use bullet points to list all the forces that are part of the problem, and resolved by the solution.

Resulting contex/related patterns
Specify any conditions or consequences that arise from using thus pattern.
Suggest any potential patterns that might be related, or arise before, alongside or after this one...

Group contributors, questions, placeholders, ideas, feedback...
